DETAILED ACTION

Drawings

1 Formal drawings were received on 28 April 2005. These drawings are acceptable.

Specification

2 Applicant amendment overcomes objection to the abstract and the objection is withdrawn.

Claim Objections

3 Applicant amendment overcomes objection to claims 7-14 and the objection is withdrawn.

Allowable Subject Matter

4 Claims 1-18, 44 and 45 are allowed. Reasons for allowance for claims 19-43 were presented in office action mailed 25 January 2005.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, in part, "steps of obtaining sensor data, forming a sample matrix, computing a plurality of singular vectors, reducing the plurality of singular vectors, computing principal components, computing a predicted data vector, calculating a residual data vector, calculating a scalar metric and categorizing the additional product unit are performed in real time as additional product units are processed in accordance with the industrial process". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 2-18 depend from claim 1.

Claim 44 recites, in part, "averaging, for each product unit, a plurality of sensor data vectors to obtain one average sensor data vector corresponding to each product unit". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claim 45 recites, in part, "updating the sample matrix by deleting from the sample matrix sensor data corresponding to at least one product unit obtained earlier in time and adding to the sample matrix sensor data corresponding to at least one product unit processed later in time; and periodically recomputing the singular vectors of the sample matrix; and periodically reducing the singular vectors to a set of principal singular vectors". This feature in combination with the remaining claimed structure avoids the prior art of record.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
